

# Stamford Construction Ltd

## ENVIRONMENTAL POLICY

Stamford Construction Limited accepts that the management of the environment is fundamental to the business and is therefore an integral part of the Stamford business strategy. Stamford shall make sound environmental management a feature throughout the organizations activities & is committed to reducing adverse work activities to ensure the lowest practicable minimum impact on the environment (carbon footprint). The Stamford board will set & monitor environmental objectives, these will be reviewed annually & revised as necessary. Stamford will monitor its environmental performance & seek to achieve continual improvement year on year. Stamford will ensure all sub-contractors are aware of their responsibilities under this policy.

### Legislation

Stamford will comply with the requirements stated in UK environmental legislation as well as being pro-active in the approach to future legislation.

### Environmental Effects

Stamford Limited will focus on the following general objectives;

- **Improve Energy Efficiency**
- **Reduce Waste**
- **Preventing Pollution**
- **Minimize Environmental Dust / Noise**
- **Eliminate Litter**
- **Minimal Impact on Wildlife / Plant species**

Stamford will cooperate fully with any environmental targets / goals set by the client that exceed company standards as part of its overall objective of minimizing harm.

Stamford will apply risk management and loss control techniques to improve their environmental performance. Stamford are committed to preventing all forms of pollution & reducing waste sent to landfill as there are sound financial reasons for doing so & will ensure any plant / equipment is re-cycled as required by the Waste Electrical and Electronic Equipment Regulations 2006 & life expired vehicles are reused / re-cycled.

### High Risk Activities

Fossil fuels used in construction plant / lighting towers particularly when re-fuelling.  
Aggregates / cements used in construction becoming airborne or leaching into the ground or ground water.  
Paints / coatings used in painting activities.  
Emissions from company vehicles.  
Noise from vehicle radios / shouting / swearing / slamming vehicle doors.

### Communication

Stamford Construction Limited will make its environmental policy widely available and will seek to develop an effective relationship with outside bodies. Stamford will promote environmental awareness amongst its employees and sub-contractors via training / tool box talks.
